-----------------	----------

Qwik Lock[®] Filter Fastening System –
Makes installing or removing your filter
quick, easy and secure.

20'/6M

Large, recessed power switch makes it easy to operate and prevents accidental operation.

Large handle for easy transport.

Blowing port for added versatility.

Unique internal storage keep accessories, hose, and 20' power cord organized and close at hand.

Tough, copolymer drum resists dents and cracks, will not rust.

Large latches provide secure drum fit.

1 7/8" Expandable locking hose stretches from 2'-7' for extended reach and convenient storage. Bleeder valve allows control of suction.

Locking tabs secure connection between wands and accessories during use.

WORKSHOPbrand

Real-world performance data achieved from testing at the end of the hose. Competitors typically test at or near motor. Gallons indicated reflect drum volume, not necessarily collection capacity. Actual capacity dependent upon type of debris collected, condition of filter, and other factors. Peak Horsepower represents a level at or below the maximum horsepower output of an electric motor tested in a laboratory using a dynamometer. All details subject to change without notice.
